# Main Program
base = input("Enter a base word: ")
add_morphemes(base)

complex_word = input("\nEnter a complex word to analyze: ")
delete_morphemes(complex_word)

```

Enter a base word: teach

```

--- Adding Morphemes ---
Add prefix 'un' to 'teach' → unteach
Add prefix 're' to 'teach' → reteach
Add prefix 'dis' to 'teach' → disteach
Add suffix 'er' to 'teach' → teacher
Add suffix 'ness' to 'teach' → teachness
Add suffix 'ly' to 'teach' → teachly
Add suffix 'ed' to 'teach' → taught
Add suffix 's' to 'teach' → teaches

```

Enter a complex word to analyze: teacher

```

--- Deleting Morphemes ---
Delete suffix 'er' from 'teacher' → teach

```
